REMARKS

The figures of births and deaths shown in this statement for week ending th: 29th September, 1956 relates to 175 towns with an estimated population of 24,415 thousands. The total number of towns is 318 and their population is 41,584 thousands. Thus 55% of the total number of towns representing 59% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 18,614 and 6,482 representing birth and death rates of 39·6 and 13·8 per thousand of population respectively.

(a) States (Part A and C):—The data here relate to 157 towns with an estimated population of 22,712 thousands. Information about Assam, Bihar, Madhya Pradesh, Orissa & West Bengal could not be included. The total number of towns is 253 and their population is 33,500 thousands. Thus 62% of the total number of towns

representing 68% of the total population is covered. The number of births and deaths recorded in these towns were 17,671 and 6,240 representing birth rates and death rates of 40·5 and 14·3 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) States (Part B):—The data here relate to 18 towns with an estimated population of 1,703 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 28% of the total number of towns representing 21% of the total population is covered. The number of births and deaths recorded in these towns were 943 and 242 representing birth and death rates of 28·8 and 7·4 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
